

兔抗 EPHA3 多克隆抗体

中文名称：兔抗 EPHA3 多克隆抗体

英文名称：Anti-EPHA3 rabbit polyclonal antibody

别名：EPH receptor A3; EK4; ETK; HEK; ETK1; HEK4; TYRO4

储存：冷冻（-20℃）

宿主：Rabbit

相关类别：一抗

反应种属：Human, Mouse, Rat

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格：

Background:	This gene belongs to the ephrin receptor subfamily of the protein-tyrosine kinase family. EPH and EPH-related receptors have been implicated in mediating developmental events, particularly in the nervous system. Receptors in the EPH subfamily typically have a single kinase domain and an extracellular region containing a Cys-rich domain and 2 fibronectin type III repeats. The ephrin receptors are divided into 2 groups based on the similarity of their extracellular domain sequences and their affinities for binding ephrin-A and ephrin-B ligands. This gene encodes a protein that binds ephrin-A ligands. Two alternatively spliced transcript variants have been described for this gene.
Applications:	ELISA, IHC
Name of antibody:	EPHA3

Immunogen:	Synthetic peptide of human EPHA3
Full name:	EPH receptor A3
Synonyms:	EK4; ETK; HEK; ETK1; HEK4; TYRO4
SwissProt:	P29320
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human liver cancer and Human cervical cancer
IHC Recommend dilution:	50-100
